**General Specification :**

Bezel Type Video wall is a series of simple and cost effective modular Video wall units that can be used along with your control room consoles. It is available in free-standing, wall mounting and ceiling mounted options. Any grid sizes are possible with our modular units. The design also allows customers to scale-up the grid in a later stage.

ard feature in all our products.

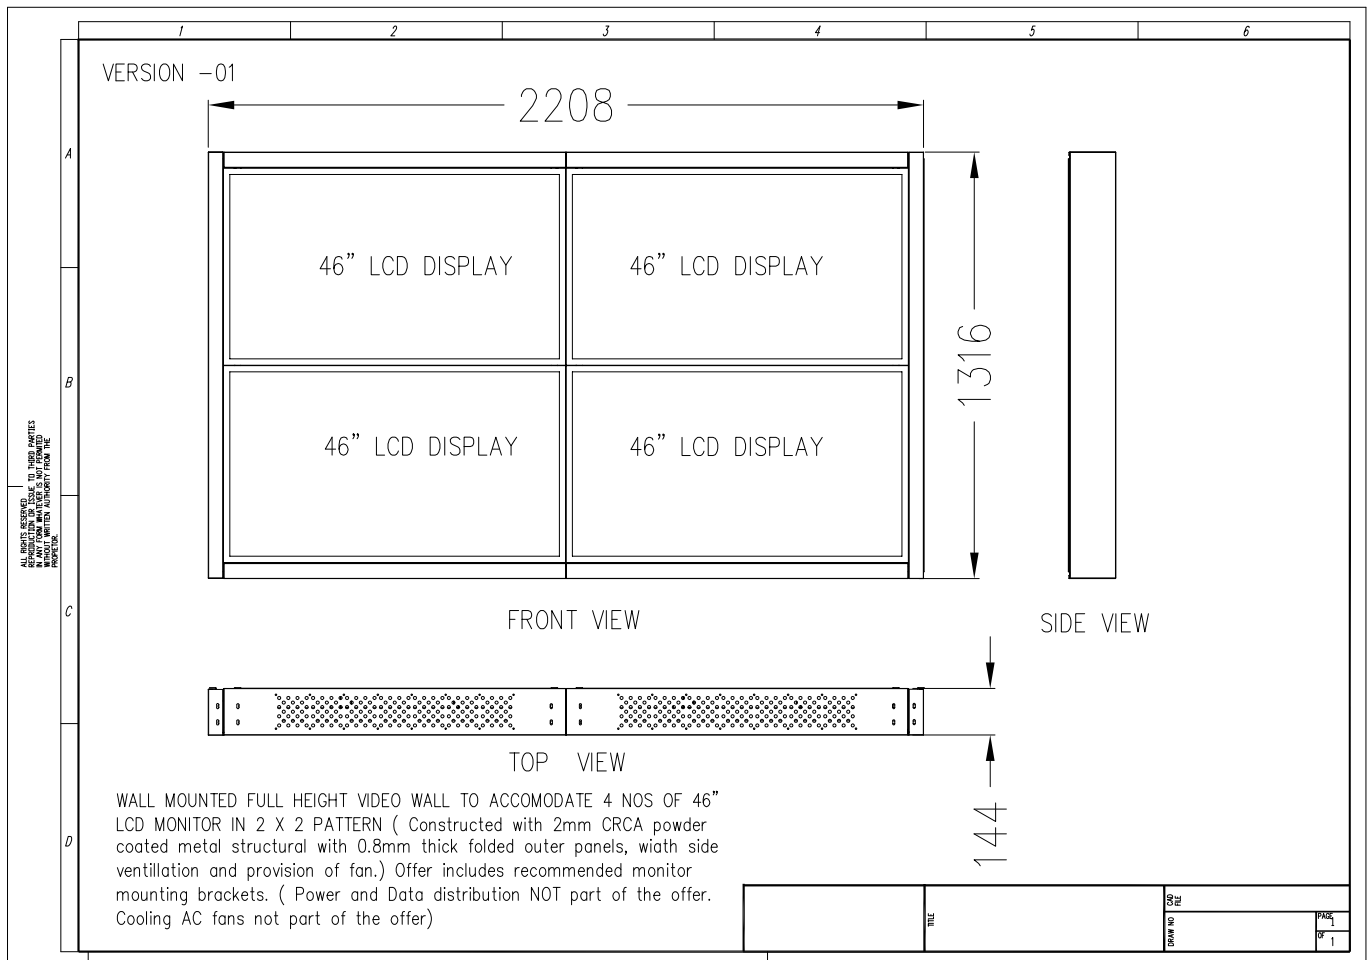

Finish : All metal items are powder-coated up to 50micron thickness to the desired shade.

**Construction :**

Bezel type video-wall structure consist of 2mm thick powder coated structural members with 0.8mm thick powder coated outer panels. Outer panels conceals the remaining sides of the video-wall.

Wire Management : Video-wall panels conceal all wiring to the monitor and provides excellent ventilation. Provision for forced cooling is a stand-

**Technical Details**

## Ultra Modern

We believe that technical environments is no different from any other workspace when it comes to aesthetic appeal. Work environments need to be inspiring and should positively influence the morale and confidence of the operator in order to deliver performance. All our products are frequently updated to ensure that it matches with the changes in lifestyle and technology.

## State Of Art

We are obsessed with technology and constantly strive to update our products with the best in technology, materials and processes. We adopt the latest engineering tools for designing each and every part of our solution to ensure that they are optimized of the best performance.

## Human Centric

We believe that the best way to achieve operator performance is to respect human factors. Work environments should inspire the individual to uplift his morale and confidence. Our team has extensive knowledge in human factors engineering to ensure the products and solutions comply with the highest standards of ergonomics.
