Model:RMC4

General Specification :

Rack Mount consoles are heavy duty fully metal consoles which has 19" type 14U rack mount capacity below the work space.

Construction :

Rack mount unit is constructed using 2mm thick CRCA framework with 0.8mm thick outer panel. It has front and rear open-able metal shutters with magnetic latch and optional lock. Shutters can be with clear acrylic window or with natural ventilation to forced cooling ventilation.

Work Surface : All work surfaces are made of 25mm pre-laminated MDF.

Wire Management : Rack mount consoles have two levels of wire manager conduits along with

power and data termination ports.

Storage Capacity : Rack mount consoles have 14U rack mount capacity at the lower portion of each unit. Each rack mount storage is equipped with a retractable CPU storage rack with heavy duty slides.

Finish : All metal items are powder-coated up to 50micron thickness to the desired shade. Shades of pre-laminated MDF can be selected from our standard colours and finishes.

Technical Details

Ultra Modern

We believe that technical environments is no different from any other workspace when it comes to aesthetic appeal. Work environments need to be inspiring and should positively influence the morale and confidence of the operator in order to deliver performance. All our products are frequently updated to ensure that it matches with the changes in lifestyle and technology.

State Of Art

We are obsessed with technology and constantly strive to update our products with the best in technology, materials and processes. We adopt the latest engineering tools for designing each and every part of our solution to ensure that they are optimized of the best performance.

Human Centric

We believe that the best way to achieve operator performance is to respect human factors. Work environments should inspire the individual to uplift his morale and confidence. Our team has extensive knowledge in human factors engineering to ensure the products and solutions comply with the highest standards of ergonomics.
