Features

Recessed Console - Classic

- > Medium duty application
- > Pre-laminated MDF understructure
- > Recessed monitor placement
- > Cabinet for CPU Storage
- > Integrated task light
- > Acrylic overlay on work surface
- > Inbuilt thermal management
- > Display mounted on flexible mounts
- > ISO 11064 compliant design

Models

Model: RCC1

Model: RCC2

General Specification :

Recessed Consoles are typical control room consoles with recessed work-surface for display mounting and integrated task lights.

Construction :

Recessed consoles are made of 18mm pre-laminated MDF and 2mm thick powder coated CRCA, with provision for rear as well as front opening. Cabinets are enclosed with metal shutters with magnetic lock and inbuilt ventilation. These consoles have retractable CPU shelf mounted on heavy duty slides.

Work Surface : All work surfaces are made of 25mm pre-laminated MDF, with optional 12mm thick acrylic overlay.

Wire Management : Recessed consoles have two levels of wire manager conduits along with power and data termination ports both within the cabinet. Internal wiring is done to the task lighting and forced cooling fans.

Storage Capacity : Equipments on the recessed-console can be stored on the retractable shelf available inside the cabinet.

Finish : All metal items are powder-coated up to 50micron thickness to the desired shade. Shades of pre-laminated MDF can be selected from our standard colours and finishes.

Technical Details

Ultra Modern

We believe that technical environments is no different from any other workspace when it comes to aesthetic appeal. Work environments need to be inspiring and should positively influence the morale and confidence of the operator in order to deliver performance. All our products are frequently updated to ensure that it matches with the changes in lifestyle and technology.

State Of Art

We are obsessed with technology and constantly strive to update our products with the best in technology, materials and processes. We adopt the latest engineering tools for designing each and every part of our solution to ensure that they are optimized of the best performance.

Human Centric

We believe that the best way to achieve operator performance is to respect human factors. Work environments should inspire the individual to uplift his morale and confidence. Our team has extensive knowledge in human factors engineering to ensure the products and solutions comply with the highest standards of ergonomics.
