Model: ST1

Model: ST3

Model: ST2

Model: ST4

**General Specification :**

Pre-laminated MDF storages with metal shutter. Option of pre-laminated MDF shutter also available. Drawers are available in 2D1F(Two Drawer, One filing), 3D (Three Drawer), 2F (Two Filing). Special printer storages are available with rack mount partitioning.

**Construction :**

Storages body are constructed using 18mm pre-laminated MDF using knock-down construction. Shutter could be metal powder coated or pre-laminated MDF.

**Wire Management :** Printer storages have integrated wire management for power and data. Termination of the same is possible within the unit.

**Storage Capacity :** Drawer units will have capacity as per the configuration. For printer storage, adjustable shelving for stationary is possible. Additionally, rack mounting accessories are available for light duty mounting.

**Finish :** All metal items are powder-coated up to 50micron thickness to the desired shade. Shades of pre-laminated MDF can be selected from our standard colours and finishes.

**Specials :** Tailor made storages both for basic application as well as for printer storages can be provided.

## Ultra Modern

We believe that technical environments is no different from any other workspace when it comes to aesthetic appeal. Work environments need to be inspiring and should positively influence the morale and confidence of the operator in order to deliver performance. All our products are frequently updated to ensure that it matches with the changes in lifestyle and technology.

## State Of Art

We are obsessed with technology and constantly strive to update our products with the best in technology, materials and processes. We adopt the latest engineering tools for designing each and every part of our solution to ensure that they are optimized of the best performance.

## Human Centric

We believe that the best way to achieve operator performance is to respect human factors. Work environments should inspire the individual to uplift his morale and confidence. Our team has extensive knowledge in human factors engineering to ensure the products and solutions comply with the highest standards of ergonomics.
