**Bezel Less VideoWall**

- > As per IEC 60297/ DIN 41494
- > Modular (vertical & horizontal)
- > Knock-down design
- > Powder coated steel structure
- > Curved and Straight options
- > Sleek and Modern aesthetics
- > Quick Installation
- > Provision for fine adjustments

## Models

Model: BLV-1L-3x6

Model: BLV-2L-3x9

**General Specification :**

Bezel Less Video Wall structure are floor mounted structure that consist of modular elements that could be configured in linear as well as curved orientation in any required matrix.

**Construction :**

All structural elements are made of modular, knock-down parts constructed out of 2.5mm thick powder coated steel machined to extream accuracy. Connecting elements are precision machined out of stainless steel. All cosmetic elements are made of 0.8mm thick powder coated steel.

**Sizes :** Bezel Less Video wall is tailor made to suite specific model of the display and the required matrix, either in linear format or in curvilinear

format. Individual display can be planned to be oriented in landscape as well as in portrait format.

**Wire Management :** Bezel Less video wall have inbuilt wiremanagement conduits and termination ports behind the structure.

**Accuracy :** Bezel Less video wall structures are built for extream accuracies. The structure can absorb floor level unevenness of up tp 20mm. Gap between the displays can be adjusted to 0.5mm. Provision for fine tuning is available for both horizonatal (+/-) 10mm as well as for vertical alignment (+/-) 3mm.

**Finish :** All metal items are powder-coated up to 50micron thickness to the desired shade.

## Ultra Modern

We believe that technical environments is no different from any other workspace when it comes to aesthetic appeal. Work environments need to be inspiring and should positively influence the morale and confidence of the operator in order to deliver performance. All our products are frequently updated to ensure that it matches with the changes in lifestyle and technology.

## State Of Art

We are obsessed with technology and constantly strive to update our products with the best in technology, materials and processes. We adopt the latest engineering tools for designing each and every part of our solution to ensure that they are optimized of the best performance.

## Human Centric

We believe that the best way to achieve operator performance is to respect human factors. Work environments should inspire the individual to uplift his morale and confidence. Our team has extensive knowledge in human factors engineering to ensure the products and solutions comply with the highest standards of ergonomics.
